Deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 580	Continued From page 1 §483.10(g)(15) Admission to a composite distinct part. A facility that is a composite distinct part (as defined in §483.5) must disclose in its admission agreement its physical configuration, including the various locations that comprise the composite distinct part, and must specify the policies that apply to room changes between its different locations under §483.15(c)(9). This REQUIREMENT is not met as evidenced by: Based on observation, interview, and record review, the facility failed to ensure the resident's physician was notified of all injuries sustained after a fall for one sampled resident (Resident #1) out of eight sampled residents. The facility census was 118 residents. Review of the facility Fall Evaluation and Prevention Policy dated 8/2020 showed: -Following a fall, the following steps should be undertaken: --Evaluate the resident promptly in order to identify and treat injuries. --Monitor closely for indications of pain or discomfort in any areas, reddened or discolored areas or other signs of injury. Review of the facility Change of Condition Notification Policy dated 6/2020 showed: -To ensure residents, family, legal representatives, and physicians are informed of changes in the residents condition in a timely manner. -Acute change of condition (ACOC) is a sudden, clinically important deviation from a patient's baseline in physical, cognitive, behavioral, or functional domains.
