(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0689 Level of Harm - Actual harm Residents Affected - Few	<p>Ensure that a nursing home area is free from accident hazards and provides adequate supervision to prevent accidents.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on observation, interview, and record review, facility staff failed to ensure residents were free from accidents when the facility failed to have a process in place to ensure staff were aware of the care planned needs of each resident resulting in the fall of one resident (Resident #1), resulting in a laceration and neck fracture, when staff provided cares alone when care planned for two staff present during cares. The facility had a census of 80. Review of a facility policy titled, Care Plan Comprehensive, not dated, showed the following information:-A comprehensive care plan for each resident is to be developed and maintained that identifies the highest level of functioning the resident may be expected to attain;-The care plan will be oriented to prevent avoidable decline in functioning and manage risk factors to the extent possible or indicating the limits of such interventions. Review of a facility's checklist form titled, Fall Prevention Intervention Care Plan, dated June 2006, showed the following checklist measures:-Ask resident every one to two hours if they need to use the bathroom;-Answer call lights promptly;-Remind the resident to ask for assistance;-Eliminate side rails and bedside commodes;-Individualize toilet schedule and/or bowel and bladder re-training;-Reorient the resident to surroundings frequently;-Visually check the resident every two hours or more often as determined by the care team;-Eliminate potential hazards;-Assess the environment to maximize safety. Review showed the facility did not provide a policy regarding falls or accidents. 1. Review of Resident #1's face sheet (basic information sheet) showed the following:-admission date of 08/06/24;-Diagnoses included depression (a group of conditions associated with the elevation or lowering of a person's mood, such as depression or bipolar disorder), persistent mood disorder (persistent feelings of depression), history of urinary tract infections (UTI), and a history of falls. Review of the resident's Minimum Data Sheet (MDS- a federally mandated assessment tool completed by facility staff), dated 10/15/25, showed the following:-The resident had severe cognitive impairment;-The resident had impairment of both sides of the upper and lower extremities;-The resident was dependent on staff for personal cares, bed mobility, and transfers. Review of the resident's care plan, dated 10/23/25, showed the following:-The resident had impaired mobility requiring dependence on staff for all activities of daily living (ADLs- activities related to personal cares including bathing, showering, dressing, getting in and out of bed or a chair, walking, toileting, and eating);-The resident had increased risk for falls;-Interventions included two staff assistance with bed mobility. Staff to turn and reposition the resident every two hours as needed if resident unable to do so on his/her own;-Two staff Hoyer lift (mechanical lift used for resident who cannot bear weight) transfer assistance;-Two staff assistance for ADL's. Review of the resident's Fall Event Report, dated 11/17/25, showed the following:-A fall was noted on 11/17/25. at 4:54 A.M.;-The fall was witnessed;-Resident rolled into the floor during dressing; -Resident had a three-inch laceration on the top middle of his/her head with a knot forming;-Staff to have all supplies next to them during cares;-The location of the fall was</p> <p>(continued on next page)</p>		

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0689</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>noted as the resident's room;-Assessment showed the resident exhibited/complained of pain to the top of his/her head;-The pain scale was noted as a 1 out of 10 (mild pain);-The resident had full range of motion without pain or limitations;-The resident was noted as lethargic/drowsy.During an interview on 11/20/25, at 1:42 P.M., Nurse Aide (NA) D said the following: -He/she was providing care to the resident on 11/17/25, when the resident fell from bed;-Certified Nurse Aide (CNA) G was present in the room assisting the resident's roommate when the fall occurred;-The NA was providing peri-care and changing the resident's clothing. The resident was positioned on his/her left side away from him/her on the bed;-The NA turned his/her head from the resident to grab peri-care supplies;-The resident rolled away from him/her while looking away, falling from the bed to the floor between the bed and the wall;-The NA did not see the resident fall from the bed or how he/she landed. He/She heard the resident hit the floor with a thump;-The bed was positioned at the NA's waist height;-The NA observed the resident on the floor on his/her stomach;-The NA immediately responded to the resident and observed the resident bleeding from an approximately three inch cut on the top of his/her head. He/She did not notice any other injuries at that time;-CNA G immediately left the room and notified the Assistant Director of Nursing (ADON):-The ADON immediately responded to the room and took over care of the resident;-The resident typically required one staff assistance for care and two staff assistance for Hoyer transfers. He/She usually provided one person care to the resident;-He/She did not know how many staff were required for care according to the care plan. He/she did not know what was indicated in the resident's care plan;-If the resident's care plan indicated two staff for care, two staff should be present for the care to ensure the resident received proper care and to prevent the resident from rolling out of bed during cares;-If additional items were needed requiring staff to divert attention from the resident, staff are to position the resident on their back prior to looking away. He/She thought he/she rolled the resident on his/her back;-If he/she would have been more focused, the fall could have been prevented. Review of the resident's progress notes showed the following:-On 11/17/25, at 5:51 A.M., the ADON documented the resident rolled out of bed and into the floor during morning cares. The resident had a three-inch laceration on the top of his/her head with a knot. The resident's vital signs were stable. The resident was assisted out of the floor and into a geriatric chair (reclined, cushioned chair). The head wound was cleansed and dressed. The Director of Nursing (DON) requested a skull series (x-ray series of the skull). The resident was sent to the hospital;-On 11/17/25, at 10:59 A.M., a nurse documented the resident returned from the hospital. The resident returned with instructions to wear a cervical collar (neck brace) at all times;-On 11/17/25, at 1:34 P.M., a nurse documented the resident had a closed non-displaced fracture of the posterior arch of the first cervical vertebra (neck fracture);-On 11/17/25, at 6:32 P.M., a nurse documented a fall follow-up showed the resident remained on observation following his/her fall on 11/17/25. The resident had soreness when rolled and moved. The resident was unable to be moved from bed for meals due to soreness and pain. The resident was fed in bed by staff.Review of the resident's Hospital After Visit Summary, dated 11/17/25, showed the following:-The resident was seen for a fall;-The resident received imaging tests of the spine and head;-The resident had a neck fracture and head laceration.Observations on 11/20/25, at 12:00 P.M., and 1:18 P.M., of the resident showed the following: -The resident was in his/her bed with his/her eyes closed;-The resident's bed was in a low position with a fall mat on each side of the bed;-The resident had a neck brace in place holding the resident's head in position;-The resident had a large, scabbed area on the top of his/her head with no bleeding noted.During an interview on 11/20/25, at 12:53 P.M., CNA A said the following: -Staff providing direct care to residents should have all needed materials for care within reach. If needed items are out</p> <p>(continued on next page)</p>

<p>F 0689</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>of reach or require staff to leave the area of care, staff are to position the resident safely, lower the bed to the lowest position, and place a fall mat prior to attention being directed from the resident or leaving the area;-Care should be provided based on the care plan;-Staff providing direct care were responsible for ensuring care is implemented according to the care plan.During an interview on 11/20/25, at 1:00 P.M., CNA B said the following: -Prior to providing care, staff are to ensure all needed supplies are at the foot of the resident's bed and in reach. If additional items are needed or are out of reach, staff should inform the resident of the additional items needed, position the resident safely in bed, lower the bed to the lowest position, and obtain the items needed;-If two staff are present for cares, one staff should remain with the resident while the second staff obtained the needed items;-The care plan should be followed. If two staff are indicated, both staff should be actively present for the care provided to ensure resident safety. The staff providing care are responsible for implementing assistance according to the care plan.During an interview on 11/20/25, at 1:10 P.M., NA C said the following: -He/She learned in report, the resident fell from bed resulting in a cut on top of his/her head requiring staples and a neck fracture;-Since the resident has returned to the facility following the fall, the resident was not eating as much and had increased pain;-The resident typically required two staff for personal cares;-If two staff were required for care, both should be present for the cares and actively participating int he care provided. One staff is usually on one side of the bed and the second staff on the opposite side to ensure resident safety;-If staff need to leave the room during cares or must grab something out of reach, the resident should be safely positioned in the bed and lower the bed to the lowest position prior to diverting attention from the resident;-Care should be provided according to the care plan. Staff providing cares are responsible for ensuring the care plan is followed.During an interview on 11/20/25, at 2:03 P.M., Licensed Practical Nurse (LPN) E said the following: -The resident fell a few days ago. The resident had a neck fracture requiring a cervical collar and a two-centimeter cut on the top of his/her head requiring two staples;-Report showed the resident fell out of bed;-NA D was the staff providing care at the time of the fall. CNA G was present in the room at the time of the fall;-The resident required two staff assistance for transfers and personal cares typically required one staff;-He/She was unsure of what the care plan indicated for the resident's personal cares'-The care plan should be followed;-If two person cares are indicated, two staff should be actively present and providing the care for the resident. The two staff would ensure proper care, assistance for rolling the resident and holding positioning of the resident during care to prevent and mitigate fall risk.-If staff are providing solo care and require additional items or assistance, they are to turn the call light on to get additional assistance while continuing to monitor and provide care for the resident to ensure safety. Staff should not divert attention from the resident during cares;-The resident's fall could have been prevented with a second person being present while cares were being provided;-Since the fall the resident has not wanted to get out of bed or be placed in his/her Broda wheelchair (a wheelchair with additional support through combination of tilt, recline, and adjustment);-Staff providing care are responsible for ensuring cares are provided safely and according to the care plan.During an interview on 11/20/25, at 2:20 P.M., Certified Medication Tech (CMT) F said the following: -He/She observed the resident on the floor between his/her bed and the wall. The resident's bed was at approximately waist height. The resident was bleeding from the top of his/her head;-NA D said he/she was providing personal cares to the resident, turned to grab something, and the resident rolled out of bed;-He/She did not know if the resident was care planned for one or two staff assistance for personal cares;-Residents should never be left unattended during cares. Staff should put the bed in the</p> <p>(continued on next page)</p>		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 265123	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED 11/20/2025

<p>F 0689</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>lowest position prior to leaving the immediate area to grab supplies or items needed that were not already in reach;-The care plan should be followed;-If two staff are required for cares, both staff should be participating in the care given to ensure safety. If two staff are not present when required, it would increase risk of a possible fall or injury if the resident is not actively being watched;-The staff providing direct care are responsible for ensuring the care plan is followed and proper safety procedures are implemented.During an interview on 11/20/25, at 2:33 P.M., the Social Services Director (SSD) said care plans should be followed to ensure resident safety. The DON and ADON were responsible for communicating the care plan needs of the residents to nursing staff.During an interview on 11/20/25, at 3:05 P.M., the ADON said the following: -NA D and possibly CNA G were in the resident room at the time of the fall. CMT F reported to him the resident's fall and immediately responded to the resident's room;-The resident was on the floor between his/her bed and the wall. The resident was on his/her right side. The resident had a three-inch laceration to the top of his/her head;-The resident was non-verbal and could not describe what occurred-The resident was sent to the hospital for further evaluation. A neck fracture was identified at the hospital;-NA D reported he/she was providing personal cares to the resident at the time of the fall;-NA D said he/she had his/her hand on the resident, reached for a shirt, and the resident rolled off the bed away from him/her;-The resident was generally one staff assistance for personal care and two staff assistance for transfers;-Staff should ensure all needed supplies are in reach before providing care;-Care should be provided according to the care plan. If the care plan indicated two staff are required for care, two staff should be participating in the care. Staff should be familiar with the care plan before providing care;-The charge nurse, ADON, and DON were responsible for ensuring staff are knowledgeable of care plan requirements for residents;-There would be increased concern for resident safety if the care plan were not followed. During an interview on 11/20/25, at 3:26 P.M., the DON said the following: -The resident fell on [DATE]. The ADON reported the resident rolled out of bed and hit his/her head. The resident was sent to the hospital for further evaluation;-She interviewed NA D following the fall. NA D said he/she was providing peri-care to the resident at the time of the fall. He/She turned from the resident to grab a shirt and while turned, the resident rolled out of bed;-CNA G was present in the room assisting another resident. The bed was at a waist high position at the time of the fall. The resident hit his/her head when he/she fell on the floor. -The DON said the resident had a two-centimeter laceration which required two staples on the top of his/her head and a neck fracture;-The resident required two staff for transfers and one staff for personal care;-Staff providing direct care should have all supplies within reach prior to providing care. If additional supplies were needed or items were not in reach staff should request assistance from the second staff in the room;-If the care plan required two staff for care, two staff should be present during cares to ensure resident safety;-The care plan should be followed;-The staff providing care are responsible for being knowledgeable of the care plan needs;-The MDS Coordinator, DON, and ADON were responsible for ensuring the care plan requirements are relayed to CNA's, CMT's, and other nursing staff;-The fall could have been prevented if proper procedures were followed.During an interview on 11/20/25, at 2:52 P.M., the Medical Director said the following: -The facility contacted one of his Nurse Practitioners (NP H) on 11/17/25 regarding the resident's fall;-Facility staff reported the resident had a three-inch laceration to the top of his/her head. The facility requested the resident be sent for x-rays;-The resident was dependent on staff for personal care;-He would expect the resident to receive two staff assistance for cares as he/she was dependent on staff for cares.During an interview on 11/20/25, at 5:00 P.M., the Administrator said the following: -She was informed of the resident's fall on 11/17/25,</p> <p>(continued on next page)</p>
