(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0641</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Ensure each resident receives an accurate assessment.</p> <p><b>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY**</b> Based on interview and record review, the facility failed to accurately code the Minimum Data Set (MDS), a federally mandated assessment instrument completed by facility staff, for three residents (Residents #3, #14, and #23) out of 12 sampled residents. The facility census was 30. Review of the facility's policy titled, Resident Assessment, revised October 2023, showed:</p> <ul style="list-style-type: none"> <li>- Assessments are completed by staff members who have the skills and qualifications to assess relevant care areas and who are knowledgeable about the resident's strengths and areas of decline;</li> <li>- Information in the MDS assessments will consistently reflect information in the progress notes, plans of care, and resident observations/interviews.</li> </ul> <p>Review of the Long-Term Care Facility Resident Assessment Instrument (RAI) 3.0 User's Manual, dated 10/2024, showed:</p> <ul style="list-style-type: none"> <li>- Code all high-risk drug class medications according to their pharmacological classification, not how they are being used.</li> </ul> <p>1. Review of Resident #3's medical record showed:</p> <ul style="list-style-type: none"> <li>- admission date of 07/31/25;</li> <li>- Diagnoses of dementia (a disorder marked by memory loss, personality changes, and impaired reasoning that interferes with daily functioning) with anxiety (persistent worry and fear about everyday situations);</li> <li>- An order for alprazolam (an antianxiety medication) 1 milligram (mg) by mouth every eight hours as needed for anxiety, dated 08/05/25;</li> <li>- No order for antipsychotic (medications that alter the brain chemistry to help reduce psychotic symptoms like hallucinations, delusions, and disordered thinking) medications.</li> </ul> <p>Review of the resident's admission MDS, dated [DATE], showed:</p> <ul style="list-style-type: none"> <li>- Resident received antipsychotic medications on a routine basis.</li> </ul> <p>2. Review of Resident #14's medical record showed:</p> <p>(continued on next page)</p>

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0804</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Many</p>	<p>Ensure food and drink is palatable, attractive, and at a safe and appetizing temperature.</p> <p>Based on observation, interview, and record review, the facility failed to provide palatable, attractive food at safe and appetizing temperatures. This deficient practice had the potential to affect all residents in the facility. The facility's census was 30. Review of the facility's policy titled, Food Preparation and Service, revised November 2022, showed:- Food and nutrition services employees prepare, distribute, and serve food in a manner that complies with safe food handling practices;- Danger zone means temperatures above 41 degrees Fahrenheit (?F) and below 135 ?F that allow the rapid growth of pathogenic microorganisms that can cause foodborne illness;- Did not address holding/serving temperatures of food. During an interview on 09//02/25 at 2:40 P.M, Resident #8 said the food could be better and it was often served cold. During a group interview on 09/02/25 at 3:10 P.M., Resident #8, Resident #11, Resident #22, Resident #23, Resident #28, Resident #29, and Resident #36 said that their food was served cold when they ate in their room. During an interview on 09/04/25 at 10:46 A.M., Resident #5 said that his/her food was often served cold. He/She ordered two hot dogs on 09/01/25, and the hot dogs were cold. He/She ordered a grilled cheese sandwich on 09/02/25, and the cheese was not melted, and the sandwich was cold. Observation on 09/04/25 at 11:05 A.M., of a test tray with a lid to cover the food showed: - A grilled pork chop with a temperature of 112 F;- Stuffing with a temperature of 116 F. During an interview on 09/11/25 at 9:20 A.M., the Dietary Manager said he/she would expect hot food to be hot and at least a temperature of 135 F when served. No residents had reported the hot food was cold when served to them. During an interview on 09/04/25 at 1:45 P.M., the Director of Nursing (DON) and Administrator said they would expect hot food to be served hot.</p>
