

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 265633	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED 11/03/2025
NAME OF PROVIDER OR SUPPLIER Cameron Nursing Center		STREET ADDRESS, CITY, STATE, ZIP CODE 801 Euclid Cameron, MO 64429	

For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0584</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Honor the resident's right to a safe, clean, comfortable and homelike environment, including but not limited to receiving treatment and supports for daily living safely.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on observations and interviews, the facility failed to maintain a clean, neat and orderly environment in the resident room [ROOM NUMBER] and shared resident restrooms for room numbers 201, 202, 203, and 204. restrooms. The facility census was 75. Review of the facility's undated Resident Rooms Cleaning policy showed:-Staff are to pick up any trash off the floors and counters, take out trash;-Look around room from ceiling down for cobwebs/dust, wipe off windowsills, night stands, dressers, TV stands, TVs and picture frames;-Use clean rag to wipe off door knobs and light switches, clean off counters beside and around sink, clean sink and faucet, clean mirror;-Sweep and mop floor, ring out mop pads, change mop x2 for each room, if there is a fall mat, clean/mop under the fall mat; -Clean bathroom, handrails, toilet, mop floor, wipe off walls.1. Observation of the resident restroom in room [ROOM NUMBER] on November 3, 2025, at 12:12 P.M., showed:-A dried, brown substance on the door frame, door and toilet tank; -A puddle of liquid on the floor next to the toilet; -The graduate (container used to measure urine) used to empty the catheter bag on top of the toilet tank, uncovered, with yellow liquid in the bottom of the graduate; -A strong smell of urine.2. Observation of the restroom shared between resident rooms #203 and #204 on November 3, 2025, at 12:45 P.M., showed:-A dried, brown substance on the toilet riser and toilet tank;-A puddle of liquid on the floor next to the toilet; -A strong smell of urine.3. Observation of the restroom shared between resident rooms #201 and #202, on November 3, 2025, at 12:19 P.M., showed:-Dried yellow substance on the toilet seat;-A strong smell of urine.4. During an interview on November 3, 2025 at 1:39 P.M., Housekeeper A stated:-When he/she cleaned the resident restrooms, he/she scrubbed the toilet, mopped the floor and behind the toilet, swept the floor. He/She also took a rag and wiped down the toilet seat, toilet tank, doors and other surfaces; -There should not be dried substances on any surface of the restroom or puddles on the floor. During an interview on November 3, 2025 at 1:37 P.M., Certified Nurses Assistant (CNA) A stated:-The resident bathrooms should be cleaned daily and if the staff see a restroom that needs attention, they should immediately tell the charge nurse or a member of housekeeping; -The graduate used when emptying a catheter bag should be rinsed after use. It is then supposed stored on the top of the toilet tank, covered. During an interview on November 3, 2025, at 1:45 P.M., Licensed Practical Nurse (LPN) A said:-The resident restrooms are cleaned daily by housekeeping staff;-If a resident, visitor or staff member sees a restroom needs to be cleaned, they should inform the charge nurse, housekeeping or Administrator; -After using the graduate to empty a catheter bag, the graduate should be rinsed then stored on the toilet tank, covered. During an interview on November 3, 2025 at 1:57 P.M., the Administrator said:-It is his/her expectation that the housekeeping staff follow the facility's policy when cleaning resident restrooms; -It is his/her expectation that resident restrooms are cleaned daily and as needed; -There should not be dried substances on the toilet, riser or any other surface;-There should not be a strong odor;</p> <p>(continued on next page)</p>

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

<p>F 0919</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Make sure that a working call system is available in each resident's bathroom and bathing area.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on observations and interviews, the facility failed to provide appropriate and adequate methods for residents to call for staff while the call light system is being repaired. Resident #1 experienced shortness of breath when being required to use a whistle to summon staff while the call system is malfunctioning. Other residents (Residents #2, #3, #4) experienced anxiety and emotional distress related to the call system not functioning. Facility census was 75. The facility did not provide a policy on the call light system. 1. Review of Resident #1's electronic medical record on November 3, 2025 showed:-The resident has the diagnoses of acute and chronic congestive heart failure (CHF; a condition where the heart cannot pump blood effectively enough to meet the body's needs), chronic obstructive pulmonary disease (COPD, a group of lung diseases that block airflow and make it difficult to breath), intervertebral disc degeneration (a condition where the intervertebral discs, which act as cushions between the vertebrae in the spine, gradually deteriorate over time), anemia (a condition where the intervertebral discs, which act as cushions between the vertebrae in the spine, gradually deteriorate over time), chronic respiratory failure (a condition where the lungs are unable to adequately exchange oxygen and carbon dioxide over a prolonged period), chronic pulmonary edema (a condition where fluid accumulates in the lungs over an extended period, leading to breathing difficulties), diabetes mellitus type 2 (a long-term condition in which the body has trouble controlling blood sugar and using it for energy), chronic kidney disease (CKD, a progressive, irreversible condition where the kidneys are damaged and lose their ability to filter waste and fluids from the blood). Review of the resident's annual Minimum Data Set (MDS, a federally mandated assessment completed by staff) dated August 12, 2025, showed:-The resident had clear speech;-He/She was able to make him/herself understood;-He/She scored 15 on the Brief Interview for Mental Status (BIMS, a structured evaluation aimed at evaluating aspects of cognition in elderly residents), indicating no cognitive impairment;-He/She used a walker and wheelchair for mobility;-The resident required substantial assistance with bathing and moderate assistance with transferring. Review of the resident's comprehensive care plan, dated September 18, 2025, showed;-Interventions related to breathing treatments related to COPD;-Oxygen tank to remain by his/her chair at all times;-The resident was at risk for falls and had an actual fall with minor injury;-Activities of Daily Living (ADL) self-care performance deficit related weakness;-The resident has limited physical mobility related to weakness;-The resident was incontinent of bowel and bladder;- The resident had impaired visual function, shortness of breath, oxygen therapy related to CHF (oxygen as ordered, encourage or assist with ambulation, use portable oxygen tank as required). During an observation and interview on 11/3/25 at 1:02 P.M., Resident #1 said:-It has been two weeks that the call light system has not worked;-The call lights by the beds don't work, but the one in the bathroom does work; -The resident had the whistle on the bedside table next to her bed;-The resident also wears oxygen;-Resident #1 stated that two days ago, the resident needed staff assistance;-He/She blew the whistle for several minutes until he/she was very out of breath;-No staff came to assist the resident, so he/she had to walk to the bathroom and pull the call light next to the toilet; -The resident said that he/she was very short of breath while walking to the bathroom and very afraid he/she was going to fall; -The resident also stated that he/she was afraid that if he/she were to fall, no one would hear the whistle or hear him/her yelling and he/she would lay on the floor for a long time. 2. Review of Resident #2's electronic medical record on November 3, 2025 showed:-Diagnoses included: Diabetes mellitus type 2, dysphagia (difficulty swallowing), cognitive communication deficit (a difficulty with communication that's caused by an underlying issue with</p> <p>(continued on next page)</p>

<p>F 0919</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>cognition), reduced mobility, Melas Syndrome (a rare genetic disorder that affects the mitochondria, the energy-producing organelles within cells), major depressive disorder (a mental health disorder characterized by persistently depressed mood or loss of interest in activities, causing a significant impairment in daily life), anxiety disorder (GAD, a mental health disorder characterized by severe, ongoing anxiety that interferes with daily activities), heart disease (heart conditions that include diseased vessels, structural problems, and blood clots). Review of the resident's quarterly MDS, dated [DATE], showed:-The resident had highly impaired hearing and vision;-He/she scored 15 on the BIMS, indicated no cognitive impairment;-He/She required partial to moderate assistance with ADL's, including bathing, transfers and mobility;-The resident used a walker for mobility. Review of the resident's comprehensive care plan, dated April 14, 2025, showed:-Interventions related to difficulty hearing;-ADL self-care deficit related to activity intolerance/impaired balance/limited mobility;-Risk for falls related to balance problems. diagnoses of and medication for anxiety and depression. During an interview on November 3, 2025 at 12:45 P.M., Resident #2 stated:-It has been about 10 or 12 days that the call light system has not been working; -When asked where the resident's whistle was, he/she pointed out it was saying on the bedside table next to the resident's recliner; -The resident states that the call light system not working and having to use the whistles gives him/her anxiety;-He/She observed his/her roommate using the whistle to call for staff and no one has come;-Additionally, the resident has troubles with balance and fears if he/she fell and could not reach the whistle or is hurt and cannot blow the whistle, he/she will lay on the floor for a long time and no one will come help him/her. 3. Review of Resident #3's electronic medical record on November 3, 2025 showed:-Diagnoses included: Diabetes mellitus type 2, presence of left artificial hip joint, repeated falls, disorder of bone density and structure, dysphagia, tachycardia (faster than normal heart rate), cognitive communication deficit, intellectual disabilities. Review of the resident's quarterly MDS, dated [DATE], showed:-The resident had clear speech with adequate hearing and was able to make self understood and is able to understand others;-He/She scored 15 on the BIMS, indicated no cognitive impairment;-He/She used a walker and wheelchair for mobility;-The resident required partial to moderate assistance with ADLs, including dressing, bathing and personal hygiene. Review of the resident's comprehensive care plan, dated June 19, 2025, showed:-Interventions related to risk for falls related to unsteady gait;-The resident received respiratory therapy related to shortness of breath;-He/She had an ADL self-care performance deficit related to intellectual disabilities, altered cardiovascular status related to tachycardia, bladder incontinence.During an interview on November 3, 2025, at 12:19 P.M., Resident #3 said:-The call light system has not been working for about two weeks; -The facility gave him/her a whistle to use to call for staff; -When asked where the whistle was, Resident #3 responded he/she wasn't sure, but it was near his/her chair. Resident #3 then looked through a pile of belongings on the table beside his/her chair, and found the whistle underneath the pile. When asked how he/she would call for staff if the whistle wasn't within arm's reach, Resident #3 responded he/she would yell for staff and hope they hear, or would walk into the bathroom and use that call light; -Resident #3 stated that using the whistle or the bathroom call light to call for help causes him/her to be nervous;-If he/she needs help in the night and can't find the whistle, he/she would have to walk to the bathroom in the dark to use that call light;-This caused the resident to be afraid he/she would fall and possibly get hurt or lay on the ground for a long time until staff come by.4. Review of Resident #4's electronic medical record on November 3, 2025, showed:-Diagnoses included: Parkinson's disease (a disorder of the central nervous system that affects movement, often including tremors), respiratory disorder, muscle weakness, dysphagia, malignant neoplasm of brain, major</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0919</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>depressive disorder, seizures (a burst of uncontrolled electrical activity between brain cells (neurons, nerve cells) that causes temporary abnormalities in muscle tone or movements(stiffness, twitching or limpness), behaviors, sensations or states of awareness), cognitive communication deficit. Review of the resident's quarterly MDS, dated [DATE], showed:-The resident had adequate hearing, clear speech, and was usually able to make self understood and usually understands others;-He/She scored 13 on the BIMS, indicating minimal cognitive impairment;-He/She used a walker and wheelchair for mobility;-The resident required supervision for ADLs, including dressing, bathing and personal hygiene. Review of the resident's comprehensive care plan, dated June 26, 2025, showed:-Interventions related to impaired visual function, altered respiratory status/receiving respiratory therapy related to obstructive sleep apnea (a common sleep disorder characterized by repeated episodes of partial or complete blockage of the upper airway during sleep);-The resident had ADL self-care performance deficit related to Parkinson's disease and malignant neoplasm of the brain;-The resident was at risk for falls, bladder incontinence and seizure disorder.During an interview on November 3, 2025 at 12:25 P.M., Resident #4 said:-It has been two weeks that the call light system has not worked. The staff gave the resident and his/her roommate whistles to use to call the staff;-When asked where the resident's whistle was, he/she pointed out it was tied to the drawers next to the bed. When asked how he/she would call for staff if he/she could not reach the whistle, the resident stated he/she would yell until someone came; -Resident #4 said that a few days ago, he/she spilled water on the floor;-He/She used the whistle for several minutes but no staff came to assist;-The resident stated he/she then propelled his/her wheelchair into the hall and down to the nurses station to find some help to clean up the water;-The resident stated this made him/her feel frustrated and afraid that if he/she fell or got sick, no one would hear the whistle and come help. During an interview on November 3, 2025 at 1:37 P.M., Certified Nurses Assistant (CNA) A stated:-The staff gave the residents whistles and bells to call for staff while the call light system is not working;-Residents with breathing problems were supposed to be given bells; -The staff were instructed to do increased rounding on the hall where the call lights were not working;-He/She said the staff were rounding every two hours. During an interview on November 3, 2025 at 1:45 P.M., Licensed Practical Nurse (LPN) A said:-Residents were given whistles and bells to use to call for staff;-Residents who have any type of lung or breathing issue were supposed be given bells; -If residents cannot use the bell or whistle, they can use the call light in the bathroom to ring for staff; -A couple of residents have made comments to LPN A that not having the call light system made them anxious;-The staff have not received any instruction to do more frequent rounding; During an interview on November 3, 2025 at 1:57 P.M., the Administrator said:-It has been about two weeks the call light system has been malfunctioning;-Residents were given bells and whistles to use in place of the call lights; -Residents with breathing difficulties were supposed to be given bells; -It was his/her expectation that staff answer the bells and whistles just like they would call lights; -The staff have been instructed to do more frequently rounding;-They were not given a specific amount of time to do rounds, but to frequently walk the halls to monitor if residents need help; -The administrator has not received any reports of residents feeling anxious or any complaints of staff not responding to the bells or whistles.
