This inspection was conducted by licensing staff using an alternate remote protocol, necessary due to a state of emergency health pandemic declared by the Governor of Virginia.

A complaint inspection was initiated on November 24, 2020 and concluded on December 2, 2020. A complaint was made with allegations related to staffing and call bell response times. The Executive Director was contacted by telephone to conduct the investigation. The licensing inspector emailed the Executive a list of documentation required to complete the investigation. A video call was conducted to test the call bell system virtually. Records reviewed and interviews conducted.

The evidence gathered during the investigation supported the allegation of non-compliance with standards or law, and violations were issued. Any violations not related to the complaint but identified during the course of the investigation can be found on the violation notice. The staffing allegation was not substantiated however, complaint is valid.

2. Staff #1 acknowledged response variations in the call bell times that were documented in the ?Lively Home GreatCall Inc? [call bell system] reports. Additionally, Staff #1 indicated the call bells were answered however, the equipment ?was not working correctly? and not in good repair. Staff #1 could not provide documentation indicating the facility staff had knowledge of the call bell system not working properly. No documentation indicating that a repair company had been contacted for the said needed repair was provided. Additionally, Staff #1 did not provide documentation, which indicated that the call bells had been answered despite the equipment not working properly.

Plan of Correction: What Has Been Done to Correct? All call bell pull stations & pendants have been tested to ensure batteries are in working order. We performed a test; engaging a pull station in a model room & advised Staff to not answer it in an effort to ascertain if system alerting was in working order. Vendor assured us after 90 minutes a call will be placed first to the Community followed by Resident Care Director's cell number. An email will then be sent to the Maintenance Director stating issue was satisfied.

How Will Recurrence Be Prevented? Call bell records will be reviewed daily and any discrepancies will be highlighted & investigated. A statement about the outcome will be indicated on the sheet. If discrepancies are vendor related, a call or email will be sent to our representative for resolution. All staff will be in-serviced again on the proper protocol for responding to call bells & to ensure all pull stations in a room are re-set.
