Technical Assistance:

To work with the pharmacy on issues discussed. If licensing can be of assistance please contact this inspector at (540) 292-5930 or via email.

Comments:

A renewal inspection was initiated on 07/13/2021 and concluded on 08/13/2021. The new administrator was contacted by telephone and email to initiate the inspection. The administrator reported that the current census was 23. The inspector emailed the administrator a list of items required to complete the remote documentation review portion of the inspection. The inspector reviewed 3 resident records, 3 staff records plus 9 additional background checks and sworn disclosures for staff hired after last inspection, staff schedules, health and fire inspections and related emergency drills, healthcare and dietary oversight along with pharmacy documentation submitted by the facility to ensure documentation was complete. The inspector conducted the remote on-site portion of the inspection on 08/13/2021 which included building and grounds, postings, emergency food supply, medication cart review, resident rooms and common areas. An exit interview was conducted with Administrator and her preceptor on the 08/13/2021 of inspection, where findings were reviewed and an opportunity was given for questions, as well as for providing any information or documentation which was not available during the inspection. Information gathered during the inspection determined non-compliance with one applicable standard or law, and a violation was documented on the violation notice issued to the facility. Thank you to the staff and residents for your cooperation during this remote inspection process. Should you have additional questions or concerns please call (540) 332-2330 or email this inspector at sharon.deboever@dss.virginia.gov.

Violations:

Standard #: 22VAC40-73-680-I
Description: Based on a desk review of medication administration records for residents 1, 2 and 3 and discussions with the new administrator and her preceptor, multiple medications for the three residents were missing a diagnosis. The corresponding orders did not consistently have a diagnosis but those that did were not transcribed to the e-mar.

Plan of Correction: The facility has had ongoing discussions with both physicians and the pharmacy regarding the need for a diagnosis both on the order and the medication administration record. A new service contract is being discussed as apparently that is not a part of the current service provided by our pharmacy. The administrator and preceptor will correct and be responsible for monitoring to maintain compliance.
